Summary

Hi, I am an engineering student in computer science and engineering. I am a frontend developer who is also interested in open source and web development. I am currently working on an ecommerce project.

I have expertise in JavaScript, React, Java, and Python. I recently participated in a hackathon hosted by Hashnode and Appwrite, where I created a WhatsApp clone. The source code for the project is available on my GitHub account.

I am passionate about building user-friendly and engaging web applications. I am also interested in contributing to open source projects. I am always looking for new challenges and opportunities to learn and grow.
